

FLOCCULANTE T53

Powder flocculant

Suitable for treatment of industrial wastewater

Technical features

- Powder flocculant for the clarification of industrial wastewater
- Mixture of components for pH buffering to obtain neutral treated water (pH 7)
- Excellent action on metals and surfactants
- High concentration that allows to work in the range 0,1/0,5%
- Excellent transparency of the treated wastewater
- Solid sludge very dry (low level of water is good, in order to perform the following burning step)
- We suggest to combine this product with activated carbon and with Flocculante T52

Physico-Chemical data

- Physical state: Powder
- Color: Grey
- Odor: None
- Density: 0,780 g/ml
- pH sol.1%: 8
- Solubility in water: TOTAL
