

PASTA DI LEVIGATURA T61

Sanding paste for tumbling

Application on all metals such as:
STEEL, BRASS, SILVER AND GOLD

Particle size: Medium-fine

Application in Vibromachine (Grinding)

- Concentrated grinding (sanding) paste for tumbling with ceramics on all types of metals, especially gold and silver
- Excellent grinding action on metals to be processed with high quality surface finish and final color of the treated metal, especially on gold and silver
- High active concentration that allows to work at concentration of 20%
- Excellent brilliance of the polished pieces
- Ease of rinsing

Physico-Chemical data

- Physical state: POWDER
- Particle size: medium-fine
- Color: GREY-BROWN
- Odor: TYPICAL LIGHT
- Density: 0.7 g/ml
- pH sol.3%: 8,5
- Solubility in water: MISCIBLE
